Deficits and Debt in the USA

Professor Richard Vietor Harvard Business School June 2013

AGENDA:

- Background
- Bush tax cuts & TARP
- Stimulus
- Obama Budget
- Current account deficit
- Quantitative easing
- Budgetary Control 2010-2011
- Fiscal Cliff
- 20/21 by 2021...

ISSUES TO PONDER....

- Can President Obama cut the deficit?
- Will U.S. savings (\$329 billion) rise?
- Who will finance the USA this year... and next year?
 - current account deficit: \$475 billion/yr.
 - budget deficit \$973 billion/yr.?
- Will China keep buying our debt?
- *Will it revalue the Renminbi beyond 6.1/\$?*

BACKGROUND....

USA 1980 – Inefficient Markets

- GDP growth -0.3%, Unemployment 7.5%
- Inflation 10%, trade deficit \$28 billion
- Productivity -0.6%; U.L.C.'s up 10.3%
- Fiscal deficit 2.4% GDP, Interest rates 19%
- \$\$ depreciating

Reagan Revolution

- Tight monetary policy
- Cut taxes 25% + ITC and accelerated depreciation
- Continue deregulation of transportation, energy, telecommunications, banking
- Let dollar rise 63%

Consequences

- Deep recession (1982-83)
- Huge trade and current account deficits
- Massive fiscal deficits
- U.S. economy grows 3.4% annually
- Inflation and real interest rates drop
- Dollar appreciates
- War in Iraq

"Slick Willie's" Run...

- Deficit Reduction Act (1993)
 - Maximum marginal tax rates hiked (41.5%)
 - Expenditures cut (\$112 bil./yr)
- Free trade (Uruguay Round & NAFTA)
- Investment boom

- Productivity grows 2.1%/year mfg 4.1%
- GDP growth 4.1% per year
- Budget balanced
- Unit labor costs negative
- Dollar strengthens ('95-'01)
- Savings falls to 1%, current account to -\$410 bil.

The Budget and Economic Outlook:

W's Tax Cuts, Terrorism and Deficits

September 11th

- Afghanistan
- Homeland Security
- Iraq
- Four tax cuts EGTRAA \$1.3 tril ('01),\$100 bil ('02), JGTRAA
 \$360 bil ('03), \$156 bil ('04)

Consequences

- Fiscal surplus (\$236 bil) \rightarrow deficit (\$1,412 billion)
- Savings 3% to -0.1%
- Debt rising from \$5.6 towards \$11.0 trillion (back to 74%/GDP)
- Current account deficit \$410 to \$731 billion
- Net foreign debt to \$2.4 trillion
- \$\$ collapsing…

Financial Crisis...

- 1. Real estate prices began falling first quarter 2007
- 2. Demand for CDOs began to decline in second quarter 2007
- 3. Bear Stearns could not cover liabilities sold to JP Morgan & bail out by Treasury
- 4. Lehman Brothers bankrupt
- 5. Morgan Stanley sold to Japanese
- 6. Merrill Lynch sold to Bank of America
- 7. Fannie Mae, Freddie Mac taken over by government
- 9. AIG taken over by government (\$129 billion)
- 9. Credit market frozen
- 10. Congress approves \$700 billion Paulson buy bad assets, re-Capitalize banks... TARP - \$380 billion
- 11. Fed lowers interest rates pumps liquidity (\$2.0 trillion) into market
- 12. Problems spread to rest of world
- 13. Stock market drops 20%+
- 14. Barack Obama elected
- 15. China unveils \$586 billion spending package
- 16. G-20 meet and agree to (1) increase IMF liquidity, (2) find joint regulatory solutions, and (3) avoid protectionism
- 17. Another bailout for CitiCorp \$41 billion + 306 bil bad assets
- 18. Bailout for GM and Chrysler
- 19. Stimulus package legislated \$787 billion...
- 20. Obama proposes budget of \$3.8 trillion
- 21. Treasury announces Public Private Investment Program
- 22. Treasury/OCC perform "stress tests" on 21 large banks \$75 bil. equity
- 23. Chrysler and then GM declare bankruptcy restructured U.S. gov't owner
- 24. G-20 agree to "rebalancing" of world economy.

TARP Funding Disbursement (as of February 18, 2009)

| Name | Bailout (in \$ millions |
|---|-------------------------|
| unds Committed Under Bush Administration | 379,800 |

Figure 1. Difference Between Potential GDP in CBO's Baseline and Actual GDP Without and With the Impact of the American Recovery and Reinvestment Act of 2009

Source: Congressional Budget Office.

Notes: Potential gross domestic product (GDP) is CBO's estimate of the maximum sustainable level of output of the economy.

Notes: CBO's January 2009 baseline projection of potential gross domestic product (GDP) is set as a reference point. The projection of actual GDP without the effects of the American Recovery and Reinvestment Act of 2009 (ARRA) is CBO's January 2009 estimate, as presented in *The Budget and Economic Outlook: Fiscal Years 2009-2019*. The projections of actual GDP with the effects of ARRA incorporated (the high and low estimates) reflect a range of assumptions.

USA Spending on Healthcare as % of GDP = 2x OECD Average

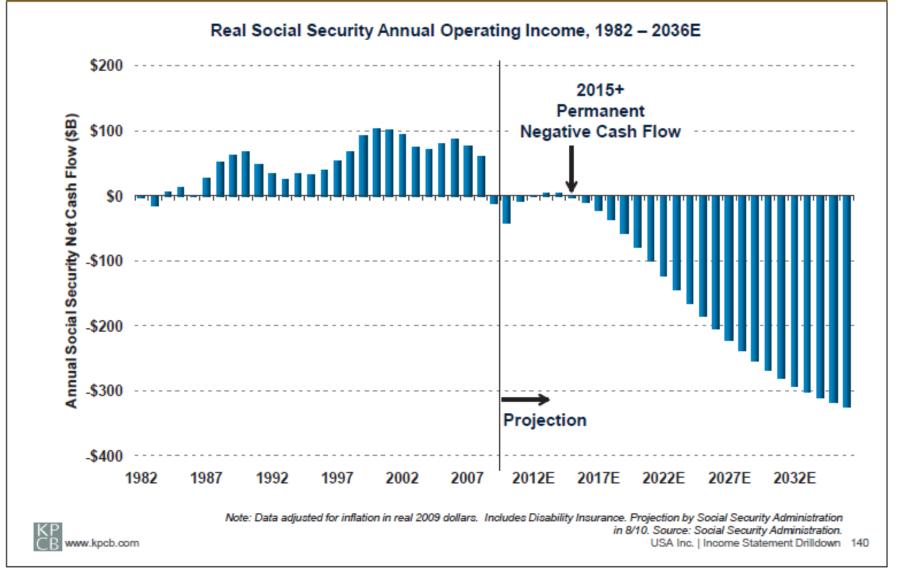

Note: OECD data adjusted for Purchasing Power Parity. *Total expenditure on health measures the final consumption of health goods and services (i.e., current health expenditure) plus capital investment in healthcare infrastructure. This includes spending by both public and private sources (including households) on medical services and goods, public health and prevention programs, and administration. Excluded are health-related expenditures such as training, research, and environmental health. Source: OECD.

Budget Control Act of 2011

- August 2, 2011 – Congress compromised to raise debt crisis

Stage #1

- Imposed caps on new discretionary budget authority designed to reduce expenditures by \$756 billion (plus \$134 billion in debt service savings), cumulatively;
- debt ceiling raised immediately \$400 billion, \$500 more when Congress votes;

Stage #2

- New Congressional committee (6×6) to cut additional \$1.2 trillion (\$1 trillion plus \$197 saved debt service), including entitlements, cumulatively;
- If Congress does not vote by December 23, automatic cuts of \$1.2 trillion, across the board...

Source: Congressional Budget Office.

Notes: Numbers may not add up to totals because of rounding.

Positive numbers indicate a decrease in the deficit.

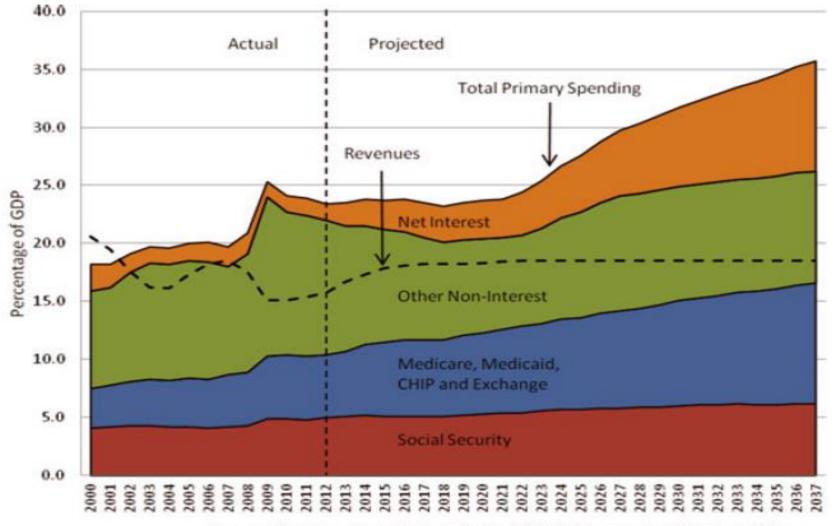

- The policy is altered in CBO's alternative fiscal scenario. For details about the policies under that scenario, see Congressional Budget Office, Updated Budget Projections: Fiscal Years 2012 to 2022 (March 2012), pp. 3–4.
- b. Not linked to specific policies; mostly reflecting changes in revenues.
- c. Economic feedback occurs because the reduction in the deficit induced by tax and spending policies would lower taxable incomes, thereby reducing revenues, and would increase spending on certain programs, such as unemployment insurance.

A wide gap exists between the future cost of the services that the public has become accustomed to receiving from the federal government – especially in the form of benefits for older people – and the tax revenues that the public has been sending to the government to pay for these services.

Because the federal budget is on an unsustainable path under current policies, those policies will need to be changed in significant ways.

*Includes spending associated with adjustments provided for the purpose of overseas contingency operations, natural disasters, and program integrity initiatives. It also assumes that the sequestration process provided for under the Budget Control Act is replaced with a greater amount of savings to come from a balanced mix of changes made in revenues and spending. As part of that replacement legislation, it is the policy of the Chairman's Mark that the statutory spending limits should be revised. However, until such time as legislation is passed that replaces the sequester with new savings and revises the statutory limits on spending, the aggregates and limits for the Senate and the allocation to the Committee on Appropriations shall remain consistent with the statutory limits established under 251(c) of the Balanced Budget and Emergency Deficit Control Act of 1985 and the enforcement procedures established under section 251A of that Act or section 901(e) of the American Taxpayer Relief Act of 2012.

**Relative to CBO's baseline, not adjusted for current policies. Relative to current policy, the plan raises revenue by \$270 billion over 2014 through 2018 and by \$975 billion over 2014 through 2023.

***Public debt is the same as gross federal debt.

| Tax credit for orphan drug research | | |

Shares of Selected Major Tax Expenditures, by Income Group, 2013

Source: Congressional Budget Office.

Notes: Quintiles, or fifths, are created by ranking households by their before-tax income. Quintiles contain equal numbers of people.

The selected major tax expenditures are the exclusion of employers' contributions for health care, health insurance premiums, and long-term-care insurance premiums; the exclusion of net pension contributions and earnings; the exclusion of capital gains on assets transferred at death; the exclusion of a portion of Social Security and Railroad Retirement benefits; the deduction for mortgage interest on owner-occupied residences; the deduction of nonbusiness state and local government income, sales, real estate, and personal property taxes; the deduction for charitable contributions; reduced rates on dividends and long-term capital gains; the earned income tax credit; and the child tax credit.

\$600 in revenue increased

Federal Debt Held by the Public

Source: Congressional Budget Office, Updated Budget Projections: Fiscal Years 2013-2023, May 2013.

Debt Held by the Public Under Current Law and the Illustrative Paths, Including Economic Effects, Fiscal Years 2013 to 2023

Source: Congressional Budget Office.

President Dick's back-of-envelope proposed spending reforms:

- The CBO's 10-year (2011-2021) projection of the federal budget shows a cumulative deficit of \$7.74 trillion (with stabilized physician payments adding \$30 billion/yr. and extension of Bush tax cuts subtracting \$395 billion/yr.) ... to reach a deficit of 1% by 2021, with spending at 21% of GDP and revenues at 20%, I propose the following:* Spending Cuts:
 - Defense spending down Overseas Contingency OPs
 - Select Committee's failure mandatory cuts of \$1.2 trillion
 - Social Security reduce COLA(0.5%), raise retirement age
 - Bowles-Simpson health care cuts
 - Interest on debt

Revenue reforms:

- Raise taxes on gasoline \$.50/gal over 4 years
- Impose carbon tax (\$2/ton CO₂ \$12/ton (6 years)
- Eliminate Bush tax cuts on rich -2013
- VAT tax 2% (except food staples and children's clothes)
- Interest on debt

20 X 21 by 2021

* These proposals are part of work on competitiveness prepared by Matt Weinzierl and Richard Vietor

Consequences of Malfeasance, 2013-2014

America has numerous strengths – R&D, education, technology, venture capital, entrepreneurship, efficient labor markets, labor mobility, natural resources, agricultural leadership and corporate leadership.....BUT...

- huge fiscal deficits (that need to be reduced);
 - war and social entitlements expenditures curtailed;
 - taxes raised (or exemptions eliminated)...
- •debt rising \rightarrow debt service rising \rightarrow eventually interest rates up
- higher interest rates can curtail investment
- lingering high unemployment → undercuts consumption
 → exacerbates deficit
- \$\$ will fall... but that will help exports
- all this will engender slow growth (1.6%-2.6%) and a prolonged recovery...

... and then **ONLY** if Americans work at it and their Congress compromises!
